ABOUT ME

Creative web developer with experience in building, optimizing and maintaining the performance of user centric websites. Clear understanding of modern technologies and best design practices. An ambitious problem solver willing to join a team of like-minded people.

WORK EXPERIENCE

Backend Developer (Team Head)

November 2022 - May 2023

Duckcart (currently working)

Lead the team of 12 members, optimized and maintained main server(AWS) of the company along with the database(MongoDb). Added numerous features like Payment Gateways, Notifications, International currency conversion. Played an important role in the development of new Startup website. Learnt important tools like **Slack, Jira, Notion** etc.

Full Stack Web Developer (Intern)

February 2022 - June 2022

QWings

Polished my MERN stack skills and worked along with seniors in maintaining the main website of the company. Updated my old coding skills and learnt time management. Added features related to backend like login, signup, authentication and saving data to database. Also learned advanced and custom hooks used in react to **optimize** the website and provide **best user experience**.

PERSONAL PROJECTS

Krypt (React + Solidity)
